Objective:

Third-year Computer Science student at York University with hands-on experience building software applications and working with programming languages, databases, and full-stack development tools. Strong foundation in problem-solving, object-oriented programming, and technical communication, with an interest in software development and technology internships

Education

Bachelor of Science (BSc), Computer Science — **York University - Toronto, ON**

Expected Graduation: 2028

Relevant Courses: Introduction to Database Systems, Advanced Object-Oriented Programming, Computer Organization

Elements of AI, University of Helsinki — 2 ECTS Credits | 2023

Project Experience

TutorAssist — Oct 2026

- Integrated a local Ollama multimodal model to analyze images and generate personalized student progress reports
- Developed a full-stack reporting workflow using React and Python FastAPI to automate tutor reporting
- Implemented MongoDB to store tutor accounts and manage student information

Employee Login and Registration System — Aug 2026

- Developed an employee login and registration system using Java and SQLite to securely store, retrieve, and manage employee information and one-time registration codes
- Designed a Java Swing GUI using JFrames for employee login and registration functionality
- Debugged and tested authentication and registration workflows to identify and resolve functional issues

Work Experience

Coding and Robotics Instructor

Megamind Learning Centre — Sep 2026 - Present

- Teach Python, Scratch, and Roblox (Lua) programming concepts through hands-on coding activities, adapting technical concepts for students with varying levels of experience
- Lead groups of up to five students through LEGO robotics projects, applying programming and robotics concepts to hands-on challenges

Tickets and Season Pass Attendant

Wet ‘n’ Wild — June 2025 - Sep 2025

- Processed 100+ ticket and season pass transactions in a fast-paced environment using a POS system, contributing to a 30% reduction in customer wait times
- Entered and maintained data for 200+ season passes in the company’s system, ensuring accurate records and organized information

Skills

Programming: Java, Python, C, JavaScript, SQL

Web Technologies: React, FastAPI, HTML, CSS

Databases: MongoDB, SQLite, Oracle Database

Tools: GitHub, VS Code, Eclipse, PyCharm, Linux

Additional Skills: Microsoft Excel, PowerPoint, JUnit
